Alluce Valgo Solution®

Alluce Valgo Solution® is a technologically innovative sock conceived to embrace the foot and aid it in its functions.

- **Essential for anyone with Bunion (Hallux Valgus) or has a tendency to developing it:** its strength lines prevents abnormal deviation of the big toe towards the other toes.
- **Easy and convenient,** it will also reduce rubbing of the bursitis against the shoe.
- **An active care** is obtained from the differing weaves of the fibres in its various bands, which move with the foot, massaging it and thereby favouring lymph drainage and firming the muscles.
- **A natural shape** of the foot is maintained both during rest and in movement. It is useful for those who stand for long periods or running and walking enthusiasts. It frees and aids the foot, offers good breathability and its **Sanitized® anti-bacterial** treatment fights the formation of bacteria, the cause of bad foot odour.

Alluce Valgo Solution®

Its concept is the result of years' experience in physiotherapeutic bandages.

So this is the origin of the **Alluce Valgo Solution®** sock, studied and developed by technologically weaving and mixing Cotton-Lycra-Elastic Nylon yarns to respect the natural strength lines of the foot muscles and joints.

A wide big toe space offers its greater freedom of movement.

The metatarsal joint is firmly bound, creating a comfortable cushion for the big toe joint, a common place for bursitis.

For your needs Unisex models

Minimax:
available in optic
white and black
in sizes: S-M-L

Short-Medium-Long:
available in optic
white and black
in sizes:
S - M - L - XL

Band ①: Cotton + Lycra with high-density elastomeric resistance, given different weave characteristics. It conforms to the natural strength lines of the foot muscles and joints and hinders deviation of the big toe towards the other toes.

The weave lines ②: binding the metatarsal joint and interact with band ①, amplifying its effects on the big toe and foot muscles.

Band ③: Soft Cotton + Elastic Nylon with more or less dense weaves studied to provide a correct binding that favours lymph drainage.

Band ④: 100% cotton, soft, classic weave.

Recommendations and user instructions:

At first it is best to use them gradually. about 2-3 hours to start with, slowly increasing to all day. They have no side effects, although at first your foot or calf muscles may ache. The lymph draining massage effect is obtained even with healthy feet. If reddening or pain persists consult your doctor.

Composition:

60% Cotton
33% Polyamide
7% Lycra

prodotto 100% italiano
